Portfolio: Coming Soon

SUMMARY

Self-taught Full Stack Developer passionate about creating impactful, scalable, and user-friendly applications. Motivated by curiosity and the drive to understand every layer of web development—from UI design to server architecture. I aim to master the process of building, launching, and maintaining applications so I can eventually create and release my own. Entrepreneurial mindset with a hands-on approach to problem-solving and learning by doing.

TECHNICAL SKILLS

Front-End: HTML, CSS, JavaScript, React, Tailwind CSS

Back-End: Node.js, Express, REST APIs

Database: MongoDB, PostgreSQL

Tools: Git, GitHub, VS Code, Linux

Other: Responsive Design, Authentication, Deployment (Render, Vercel, Netlify)

PROJECTS

NeighborLink — A community-based web platform connecting neighbors for mutual help, built with the MERN stack. Implemented secure user authentication, real-time messaging, and intuitive UI for easy neighborhood collaboration.

Personal CRM — A full-stack contact management tool designed for freelancers and entrepreneurs. Built with React and Node.js, featuring dynamic dashboards, tagging, and reminders to keep personal relationships organized.

WatchWise — A movie and series recommendation app using external APIs and PostgreSQL. Focused on delivering a clean UI with personalized suggestions and responsive design for all devices.

EDUCATION & TRAINING

Self-Taught Developer

Learned full-stack development independently through online courses, open-source

contributions, and building real-world projects. Focused on mastering JavaScript ecosystems and understanding how to turn ideas into full-fledged applications.

ENTREPRENEURIAL GOAL

Driven by an entrepreneurial spirit, I approach coding as both a craft and a means to innovate. My goal is to gain deep technical expertise and business understanding so I can one day launch, grow, and maintain my own successful web application from the ground up.
