

HECTOR VIRREY

Full-Stack Developer | Software Engineer

Chicago, Illinois • Open to Remote | 331-312-2415 | hv.fin25@gmail.com | [GitHub](#) | [HectorVirrey.com](#) | [LinkedIn](#)

OBJECTIVE

Full-Stack Developer focused on solving customer problems through reliable, easy-to-use web applications. I bring hands-on experience with React, Next.js, TypeScript, Supabase, PostgreSQL, and REST APIs, along with practical troubleshooting skills and attention to detail. I'm looking to help a team improve customer experiences, streamline everyday tasks, and build products that support business growth.

SUMMARY

Self-directed full-stack projects include server-validated bookings, tested earnings calculations, and direct messaging. Trailer and refrigeration repair experience includes systematic diagnostics and independent problem-solving.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, SQL

Frontend: React, Next.js, Tailwind CSS, Responsive UI

Backend & Data: Node.js, PostgreSQL, Supabase, REST APIs, Authentication, Row Level Security

Tools: Git, GitHub, Vercel, VS Code

EXPERIENCE

Independent Full-Stack Developer | Self-directed projects

PetCare Hub — Full-Stack Pet Services Marketplace | *Next.js • React • TypeScript • Supabase • PostgreSQL* | [Live](#) • [GitHub](#)

- Built and deployed a two-sided marketplace connecting pet owners with service providers, including authentication, pet management, provider profiles, availability, bookings, and reviews.
- Implemented server-validated booking workflows and database authorization using Supabase Auth and PostgreSQL Row Level Security.
- Designed relational data models and protected owner/provider workflows while maintaining a responsive production UI.

GigMate — Gig Work Earnings & Profitability Tracker | *Next.js • TypeScript • Supabase • PostgreSQL* | [Live](#)

- Built a full-stack dashboard for tracking gig sessions, mileage, expenses, estimated taxes, cash profit, take-home pay, and effective hourly rate.
- Developed a centralized financial calculation engine with automated tests covering core earnings and expense calculations.
- Implemented authentication, persistent user settings, database security policies, analytics, filtering, and data visualization.

NeighborLink — Local Marketplace Platform | *Next.js • TypeScript • Supabase • PostgreSQL*

- Built a local marketplace with listings, image uploads, search and filtering, favorites, user authentication, and direct messaging.
- Implemented database-backed messaging with unread states and user-scoped marketplace data.
- Developed responsive listing creation, browsing, detail, and account workflows backed by Supabase.

CTR Services Inc. — Trailer & Reefer Technician | *July 2024 — Present*

- Diagnose and repair electrical, mechanical, refrigeration, braking, and trailer systems in a production service environment.
- Use diagnostic information, schematics, testing equipment, and hands-on inspection to identify fault causes and resolve repairs accurately, applying systematic problem-solving relevant to development work.
- Manage repairs independently while documenting work, communicating findings, and prioritizing safe, reliable equipment operation.
